TIMIPADO IMOMOTEBEGHA

T.Silikowei-Imomotebegha@lboro.ac.uk

PROFESSIONAL SUMMARY

Researcher and communicator building sociotechnical evaluation methodology for AI systems that interact with people in consequential ways. As AI becomes embedded in how humans learn, work, form relationships, and make decisions, the question of how we evaluate these systems for safety, trustworthiness, and alignment with human values becomes foundational. Current specialisation in personality-adaptive relationship-forming AI, with two accepted publications at CHI and UMAP (the global top-tier venues in HCI and user modelling), a production platform built on AWS, and a multijudge adversarial evaluation framework. Career foundation in corporate communications with professional experience translating complex technical material for stakeholders across government, defence, academia, and industry.

PROFESSIONAL EXPERIENCE

The Alan Turing Institute | Data Science Facilitator *June 2025 – Present*

Data Science and Defence Programme

Teaching cryptography, natural language processing, and computer vision across 15 UK universities alongside defence partners, reaching over 400 students within defence and critical national infrastructure sectors. Leading widening participation initiatives to diversify the pipeline into defence data science.

Conception X | Cohort 9 Deep Tech Founder *February 2026 – November 2026*

Selected for the UK's leading deep tech accelerator for PhD founders. Building SyntheticWatch, a continuous behavioural monitoring and verification platform for AI systems, commercialising evaluation methodology from doctoral research.

Loughborough University | Operations Analyst (Maia Network) *July 2023 – April 2025*

Developed data-driven frameworks for programme evaluation, increasing participant engagement by 15%. Reduced administrative burden by 20% through evidence-based process redesign. Designed and delivered leadership development workshops analysing performance metrics to inform strategic decisions.

Velocity Global | Associate Data Product Manager *August 2021 – March 2023 London*

Prototyped analytical dashboards using SQL, Looker, and Excel for real-time performance tracking. Researched emerging technologies to optimise operational workflows, achieving 18% reduction in onboarding time. Communicated evidence-based process improvements to cross-functional stakeholders.

Cornerstone OnDemand | Corporate Communications Coordinator

June 2019 – September 2020

Luton

Developed and implemented data-driven communication strategies, improving engagement metrics by 25%. Designed systematic campaigns evaluating performance through analytical approaches and refining strategies based on empirical evidence and stakeholder feedback.

PUBLICATIONS

T. Imomotebegha. 2026. When Users Don't Want Privacy: Identity Laundering and Behavioral Privacy Nihilism in Generative AI. In *Extended Abstracts of the 2026 CHI Conference on Human Factors in Computing Systems* (CHI EA '26). ACM. **(Accepted)**

T. Imomotebegha. 2026. Personalisation as Attack Surface: How Affective AI Enables Psychometric

Targeting and Adversarial Exploitation at Scale. In *Proceedings of the 34th ACM Conference on User Modeling, Adaptation and Personalization* (UMAP '26). ACM. **(Under review; rebuttal submitted expanding from short to full paper)**

T. Imomotebegha. 2026. When Personalisation Becomes Exploitation: An Integrated Evaluation Methodology for Personality-Adaptive Relationship-Forming AI. *UMAP 2026 Doctoral Consortium*. **(Accepted)**

EDUCATION

Loughborough University — PhD in Human Computer Interaction *2023 – 2027*

Developing adversarial evaluation methodology for personality-adaptive relationship-forming AI. Built a production AI mentorship platform with three culturally grounded personas, semantic memory, and 260+ behavioural data points. Four-category threat taxonomy with multi-judge evaluation framework. Supervised by Dr. Elizabeth Ratcliffe. Funded through the Vice Chancellor's Research Cluster in Inclusive Engineering (£500k, 5 PhDs).

Loughborough University — MSc Data Science *2021 – 2022*

Loughborough University — BSc Communication and Media Studies *2017 – 2021*

RESEARCH FUNDING AND AWARDS

Vice Chancellor's Research Cluster in Inclusive Engineering *2024–2028 | £500k*

Competitively awarded fully funded PhD position within a five-PhD research cluster.

Co-Investigator | Royal Academy of Engineering Diversity Impact Programme Award *2023–2025 | £100k*

Co-Investigator on funded programme developing evidence-based interventions for underrepresented groups in STEM.

AAAI "AIx" Pop-Up Events *2025–2026 | $1k*

Sponsored event led by myself at Loughborough University.

Research Relay Award | Loughborough University *2025*

Recognised for excellence in research communication and knowledge transfer.

Inspiring Women Loughborough Award | Maia Network *2024 and 2025*

GRANT REVIEW

EDI Hub Plus Flexible Fund *2025 | £1 million fund*

Peer reviewer evaluating proposals for methodological rigour, innovation potential, and societal impact within STEM education and workforce development.

TECHNICAL SKILLS

Infrastructure: AWS (Lambda, DynamoDB, Bedrock, SageMaker), serverless architecture · **AI/ML:** LLM application development (Claude, Llama, GPT-4o), adversarial evaluation pipelines, Amazon Titan embeddings · **Research:** Python, SQL, psychometric assessment design, mixed methods, longitudinal study design
